Stamp and signature of the veterinary.

.....

(1) Delete what is not applicable.

Only the vaccination that was given during the period of validity of the previous one is to be considered a revaccination.

(2) Period of validity :

- starts after 30 days for the first vaccination and for a revaccination when the period of validity of the previous vaccination has expired;
- dogs and cats under three months of age : three months beginning on the thirtieth day after vaccination;
- dogs and cats over three months of age : one year for the majority of foreign countries. For the Benelux countries the period of validity depends on the type of vaccination used in accordance with its instructions.

(3) The month should be written out in full.

(4) full name and address.
